Batch 1

#Problem 11(A)

```python
def frequency(s):
    dict1={}
    for i in s:
        if i not in dict1:
            dict1[i]=1
        else:
            dict1[i]+=1

    for i,j in dict1.items():
        print(i,j)

s=input("Enter the string:")
frequency(s)
```
